

A considered restoration sequence

01 / Inspect

Record the condition and coating. Resolve loose, soft or otherwise unsafe areas before surface work.

ILLUSTRATION / Sequence order, not elapsed time or a guaranteed result.

02 / Clear loose debris

Observe gaps, drainage and sheltered zones. Do not assume the underlying surface is ready for treatment.

ILLUSTRATION / Sequence order, not elapsed time or a guaranteed result.

Plan a representative test. Keep gray or restore color based on your goal and verified method.
Not structural assessment, chemical compatibility advice or a universal maintenance schedule.

A considered restoration sequence

03 / Test the method

Use a compatible cleaner and its label. Record dilution, tool, protection, contact time and rinsing.

ILLUSTRATION / Sequence order, not elapsed time or a guaranteed result.

04 / Review the clean surface

Cleaning may retain a gray appearance. Compare a fully dry test with untreated material.

ILLUSTRATION / Sequence order, not elapsed time or a guaranteed result.

Plan a representative test. Keep gray or restore color based on your goal and verified method.
Not structural assessment, chemical compatibility advice or a universal maintenance schedule.

A considered restoration sequence

05 / Dry and inspect

Use the actual product moisture and weather criteria. A dry-looking surface does not establish readiness.

ILLUSTRATION / Sequence order, not elapsed time or a guaranteed result.

06 / Prepare as required

Identify the coating and hazards first. Verify the preparation method for the actual wood and product.

ILLUSTRATION / Sequence order, not elapsed time or a guaranteed result.

Plan a representative test. Keep gray or restore color based on your goal and verified method.
Not structural assessment, chemical compatibility advice or a universal maintenance schedule.

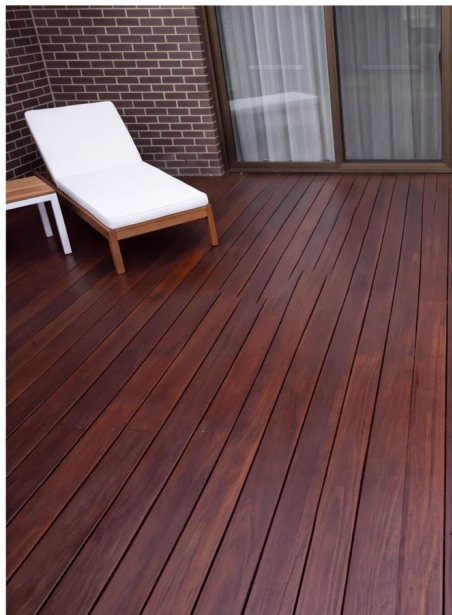

A considered restoration sequence

07 / Finish if selected

Keep-gray care may omit finishing. For a finish, follow the exact application and excess-removal directions.

ILLUSTRATION / Sequence order, not elapsed time or a guaranteed result.

08 / Review and record

Approve the dried test, follow return-to-use instructions and keep product, date and observation records.

ILLUSTRATION / Sequence order, not elapsed time or a guaranteed result.

Plan a representative test. Keep gray or restore color based on your goal and verified method.
Not structural assessment, chemical compatibility advice or a universal maintenance schedule.
